

ZHANGCHI WANG

No. 1 Fenglin Road, Wuhan Economic & Technological Development Zone, Wuhan, Hubei 430415, China | +86 18064054749 | edwardwangzc@163.com

EDUCATION

ISA Wuhan Wenhua High School — IB Diploma Programme	09.2024 – Present
Courses: Economics HL, Physics HL, Mathematics: Analysis and Approaches HL, Chinese A Lang & Lit SL, English B Lang & Lit SL, Chemistry SL	
Affiliated Foreign Language School of Wuhan University — Grade 10: AP	09.2021 – 07.2024
TOEFL 5.5 (R6.0 L5.5 S4.5 W6.0)	09.2026
SAT 1550 (Reading & Writing 750 · Math 800)	09.2026
AP: Calculus BC 5 · Physics C: Mechanics 5 · Microeconomics 5	05.2025
Intended Major: Mechanical Engineering, Motorsports Engineering, Robotics / Mechatronics, STEM Education / Engineering & Society, Electrical Engineering, Aerospace Engineering	

RESEARCH & INNOVATION

“Micro Flying Car with Storage Structure” — Research & Development	10.2024 – Present
- Combines the load-bearing capacity of RC cars with the flexibility of drones, plus a storage compartment compatible with multiple vehicle models; enables reuse of discarded materials and practical cargo transport. - Championship, China Wuhan Innovation Method Competition (among 277 projects); granted three national patents. - Featured in 10+ reports by provincial, municipal and district authorities; invited to exhibit at the Wuhan Science and Technology Museum, the 7th TalentShow of Young Ambassadors for International People-to-People Exchange, and the Guangzhou Science & Technology Innovation Festival.	
S.-T. Yau High School Science Award (Physics)	01.2026 – Present
<i>Mechanism of Thermal–Quasi-Static Similarity Failure and Corrected Mechanics Model for 1/10-Scale Electric Touring Cars under Scale Distortion.</i> 1/10 RC car scale-distortion physics; ran 5 controlled experiments; derived & corrected equations; built the Fast Setup Decision Tree (FSDT). Mentors from Wuhan University of Technology.	
Paper submitted to Engineering Index (EI) journal	07.2026 – Present
<i>Multimodal Decision-Making and Structural Optimization of a Ground–Air Amphibious Micro Flying Car for Mountain Emergency Rescue.</i> - Developed & designed a dual-mode energy-aware algorithm, foldable hardware and special-shaped blades for the micro flying car.	
STEM Public-Welfare Course Kit for Adolescent Students Based on RC Cars — Developer	09.2024 – Present
- Kit: e-publication <i>RC Cars, Real Science: A STEM Journey for Teens</i> (222-page textbook delivered), 3 sets of 3D-printable RC chassis, and a step-by-step club operation guide. - Highest Distinction (Top 5%) and Most Creative Solution, CTB (China Thinks Big) 2025–2026 National Conference; advanced to the Global Finals at Harvard University; paper included in the CTB National Conference Proceedings.	

LEADERSHIP & ENTREPRENEURSHIP

Founder & Lead Instructor / Project Director, STEM Education Equity Initiative	12.2025 – Present
RC-racing-based STEM program for 4 under-resourced schools in Hubei and the Wuhan Science and Technology Museum: 300 students covered, teaching materials donated to 2 schools (textbooks, RC cars, tools; >5,000 RMB), 3 seed teachers and 5 volunteers trained. Aligned with UN SDG 4. Shortlisted, Fosun Foundation 2025–2026 Infinite Visionaries Award.	
Co-founder & Technical Director, High School Society of Racing Car Technologies (HSRT)	12.2024 – Present
Nationwide competition for high schoolers: 3D-printed chassis and pneumatic components; authored the technical regulations and baseline vehicle design. 4 seasons hosted, 20+ teams, ~400 competitors. Driver (Season 1) and technical consultant (Season 2) for the ISA team.	
Founder & President, ISA Wuhan RC Racing Club	10.2024 – Present
Recruited 15+ members; weekly theory and racing training; 7+ festival events; teams entered in 5 competitions incl. national championships; school “Star Student Organization”; CTB Innovative Research Community.	
CTB (China Thinks Big) Alumni Academic Association (CAAA) — Committee Member	07.2026 – Present
Invitation-only; ~10 selected nationwide per year. Guides new CTB participants via text, video and live-streaming.	
Founder & President, CTB Club of ISA Wuhan Wenhua School	10.2025 – Present
Recruited 25+ members; 3 teams advanced to the National Round: 1 first honor, 1 second honor, 1 regional third honor.	
Proposed the “Experience Gap” concept in STEM education	04.2026 – Present
The internet lets students see technology, but not touch it; launched an initiative to bridge the gap. Articles submitted to <i>Middle School World</i> and <i>China Education Daily</i>.	
Team captain, HMMT (Harvard-MIT Mathematics Tournament) — 79th globally, team of 6	11.2025
Team captain, CNEC (China National Economics Challenge) — national round, 20+ certificates, team of 4	02.2026

ACADEMIC & PROFESSIONAL DEVELOPMENT

Four courses on new-energy vehicles and AI — Outstanding Student recognition	2024 – Present
- Global Academician Workshop of Engineering Frontier and Intelligent Manufacturing (Prof. John Biggins, University of Cambridge, 6 days). “Design of a New-Energy Vehicle” winter project (7 weeks: EV history, BIW design, torsional stiffness, NVH, crash tests, CAD/CAE workflows) — Outstanding Student. - Zhejiang University Qizhen Laboratory AI Innovation Camp (5 days: AI ethics, AIGC, chip applications; produced a 2-minute microfilm). - Mechanical Engineering and Vehicle Engineering (Prof. Diana Haidar, Carnegie Mellon University, 72 class hours).	

MEDIA & PUBLICATION

Creator, “ISA RC Racing” WeChat Official Account & Video Account • 140+ publications, 200,000+ total pageviews, 1,300+ followers.	09.2024 – Present
QQ Sports Car Channel Creator — 100+ posts for 10,000+ channel members over 2 years	2024 – Present

COMMUNITY SERVICE

STEM charity courses — 4 schools & Wuhan Science and Technology Museum • 6-week course for 300+ elementary pupils: on-road/off-road, electric/nitro RC cars, plus 3D-printed, driverless, intelligent and micro flying car research.	10.2025 – Present
4 charity fairs; proceeds donated to the ISA Foundation	2024 – Present
Secured sponsorships for HSRT teams — 17,500 CNY in total	2024 – Present
Volunteer: ChinalCAC 7th Conference; ISA Sports Days 2025–2026; ISA Charity Fund; XPeng Public Welfare Foundation	2023 – Present
Monthly donor to UNICEF (75 CNY/month)	2024 – Present

HONORS & AWARDS

School • Full Scholarship of ISA, 2024–2027; ISA Global Pioneers Programme, 2024–2026 • ISA Wuhan Outstanding Volunteer Award, 2024 & 2025 • ISA Annual Excellence Award in Science & Information Technology, 2025	RC Racing • National Level-2 Athlete Certificate (China), 2024 • Third Prize, National RC Car Championship, 2025 • Championships: Wuhan Municipal Education Bureau RC Car Racing 2025; Wuhan “Lei Teng Cup” 2025; Wuhan Lakeside New Year’s Cup 2026 • Gold & silver medals, National Youth RC Car Championships, 2023 • HSRT: Season 1 — Team 3rd overall, Best Straight-Line Acceleration, Star Team; Season 2 — Team 2nd overall
Academic Competition • Shortlisted, 2025–2026 Infinite Visionaries Award • Highest Distinction (Top 5%) & Most Creative Solution, CTB National Conference, 03.2026 • Gold Award, China Wuhan Innovation Method Competition, 09.2025 • National Silver (Division 1), Physics Bowl (USA), 2025; Silver, BPhO Senior Physics Challenge, 2026 • 79th place, HMMT, 11.2025; Top 25%, Euclid Contest, 2026; Third Place, AMC, 10.2024; Successful Participant, HiMCM, 2025 • Regional Top Scoring Individual & Team Awards (Micro/Macroeconomics), CNEC Preliminary, 2025 • 2nd Runner-up, Global Future Space Scholars Conference China Qualifier, 2025	Art • China Wuhan “Young Artist” Award (Fine Arts), 2023 • National Third Prize & Hubei Provincial Third Prize, 7th “Hope Song” National Youth Calligraphy and Painting Art Exhibition, 2023

SKILLS

Languages: native Mandarin, fluent English, French (2021–2024) · RC racing driver (8 years), owner of an RC studio · Painting & calligraphy (10 years; Speed Sketching Level 9, Brush Calligraphy Level 6) · 3D modeling: C4D, Fusion 360 · MATLAB · C++ · Member, China SAE; Member, Car Modelling Association of China (CMAC)
